

**JOB VACANCY**  
**X-YACHTS DESIGN LTD**

X-Yachts designs and builds high end performance and cruising yachts, with its production based in Denmark and Poland whilst design and marketing in the UK.

X-Yachts has a global network of dealers.

**Junior Designer/Naval Architect**

X-Yachts Design Ltd is looking for a Junior Designer/Naval Architect to join its UK design team. The position will involve 2D drafting and 3D modelling, contributing to a project from conceptual design to production drawings. This multi-disciplined role will include modelling GRP parts and their tooling, interior joinery and systems engineering, as well as sketching ideas, calculating load cases, and checking compliance against applicable classification rules. Providing the production teams with highly-detailed production drawings is an essential output from the design process.

**Our expectations:**

- Experience in, and passion for the yachting industry, as a builder, designer and/or as a Sailor
- Education in yacht design/production
- Design office experience 1 year or more is preferable but not essential
- Experience using 3D parametric software, such as NX, Solidworks or CATIA, is beneficial
- AutoCAD Proficiency
- Attention to details and practical approach to problem solving, with a mind for budget and productivity
- Comprehension and adaptability to X-Yachts' quality standard and past designs
- Good communication skills to work and liaise with the designers, suppliers and production managers in UK, Denmark and Poland

**We offer:**

- An exciting and challenging job in a growing international company
- Committed colleagues working as a tightly-knit team in an informal atmosphere
- Experience and involvement in all aspects of yacht development throughout the design and build process
- Opportunity to evolve within the role/company
- High technology production knowledge
